

# **CERTIFICATION REVIEW COURSE ANNOUNCEMENT**

## **Certified Professional in Soil Erosion and Sediment Control [CPESC]**

The WMSECN West Michigan Soil Erosion Control Network is pleased to inform you of the upcoming training and certification opportunity.

The **CPESC** program is designed for individuals actively involved in the following Soil and Erosion Control activities:

- Develop or review permits
- Design or review Erosion Control Plans
- Installation or inspection of Erosion Control practices
- Related activities such as, assisting regulators, authoring handbooks and educating the public

### **CPESC Certification benefits**

- Enhance your professional credibility
- Promote public awareness of the erosion and sediment control profession
- Have greater influence on policy decisions affecting technical and professional issues
- Gain access to unique sources of information and educational opportunities
- Improve your career opportunities by making more professional contacts

As a **CPESC**, you are a recognized specialist in soil erosion and sediment control. You have educational training, demonstrated expertise, experience in controlling erosion and sedimentation, and have met certification standards.

Soil erosion requirements and regulations are rapidly expanding. This course provides fundamental information on the planning, design, and implementation of soil erosion and sediment control. Most professional engineers and architects have not received formal training with this emphasis. This is an opportunity to designate a key individual within your organization with the knowledge to address key concerns.

Please review the **CPESC** website for further information. [www.cpesc.org](http://www.cpesc.org)
